 - -CQRS
 - -Auto Mapper
 - -Redis For Caching
 - -Strip Payment
 - -Unit Of Work
 - -Repository Pattern
 - -Serilog
 - -identity (User, Admin, Staff)
- -JWT Token
- -Frontend
 - -Angular 17

That Using Gsap And Scroll Trigger libraries

06/2024 - 06/2024

Meat In Pun

Online Restaurant

Project using (Asp. Net mvc)

1-using Onion Architecture,

3-having Two Roles (Admin, Customer, Staff) And Each Role have permissions Can Do Ιt,

4-Asynchronous functionality,

5-using Repository pattern

6-Admin can use features by select list or from each product directly

And encompassed various task

- 7- Payment Integration
- 8-Caching Using Redis
- 9-Error Handeling

01/2024 - 01/2024

Matrix

Electronic ecommerce Mvc

Full Stack "project using (.Net mvc). an 'MATRIX' Electronics e-commerce

1-using Ntier Architecture,

2-using ajax in shopping cart,

3-having Two Roles (Admin, Customer) And Each Role have permissions Can Do It,

4-asynchronous functionality,

5-using Repository pattern

6-Admin can use features by select list or from each product directly

And encompassed various tasks
